

RXP

ENVIRONMENTAL POLICY

RX Plastics Ltd is committed to conducting its business in a manner that is compatible with the environment with regards to where our products are sourced, manufactured, used and disposed.

We at RXP recognise that the community, employees, shareholders and customers all have a stake in the Company's environmental performance. We will achieve and maintain ISO 14001 Environmental Management System certification by committing to:

- Understanding of the impacts that our business may have on the environment and working to minimise these impacts.
- Designing products that reduce the consumption of raw materials which are fit for purpose and minimise disposal issues at end of life. Where possible, we aim to use materials that are recyclable.
- Identifying suitable products and seeking opportunities where recycled plastic materials can be re-used for a second life.
- The protection of the environment including the prevention of pollution and reduction of waste and energy.
- Fostering a culture of continual Improvement of the Environmental Management System to enhance our environmental performance.
- Efficiency in the use of resources.
- Reducing waste going to landfill by collecting and linking in with external recycling programs that handle paper, packaging, metals, glass and other materials.
- Setting objectives to improve our environmental performance and measuring our performance against those objectives.
- Benchmarking our performance against similar companies externally and within the Aliaxis Group.
- Being an active participant in the Plastics NZ Operation Clean Sweep programme.
- Complying with obligations of Customers & Interested Parties and appropriate regulations and standards.

RXP has an Environmental System in place that will ensure energy efficiency of our manufacturing operations, continual improvement of our products and Environmental performance.
